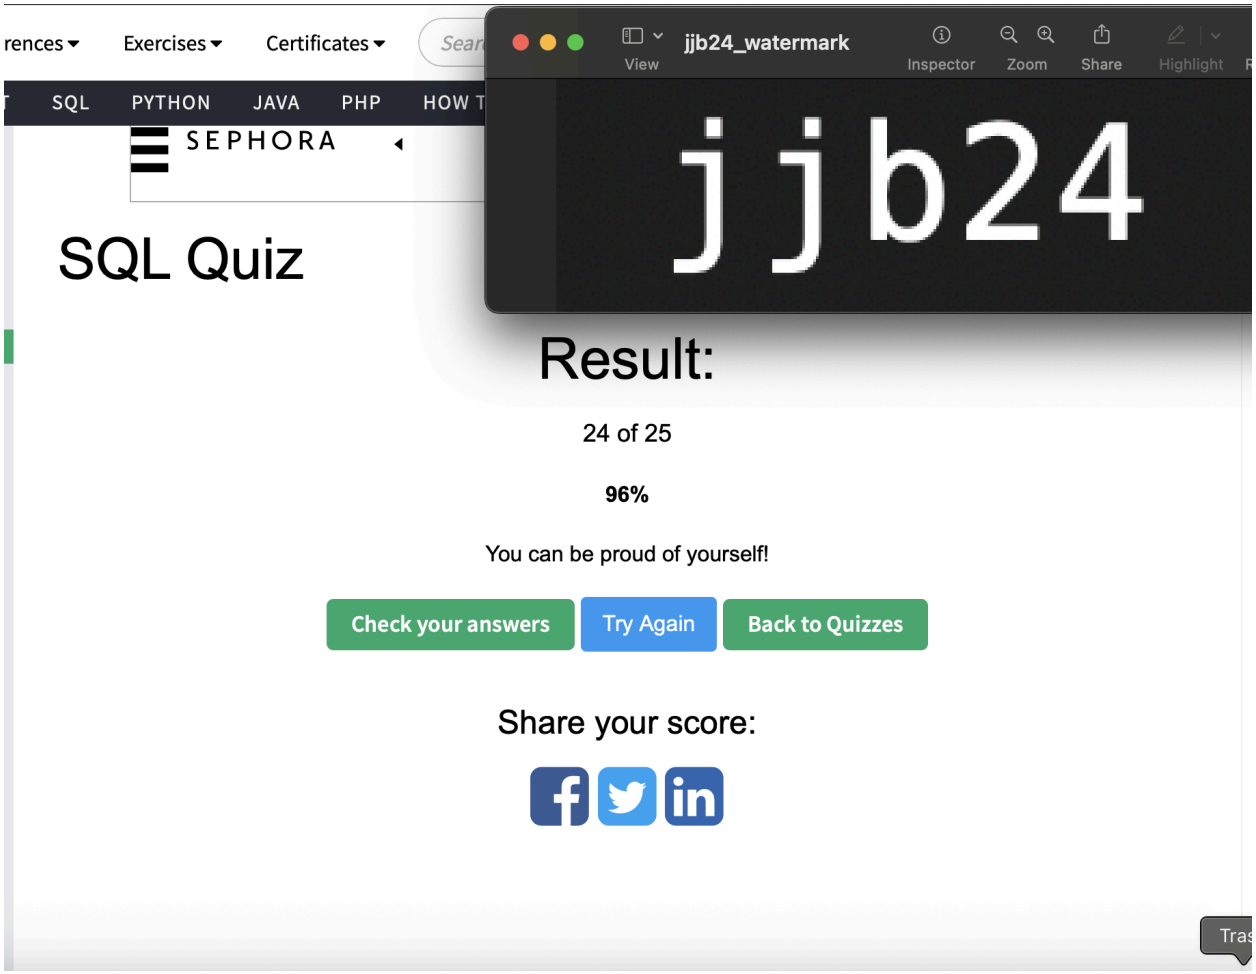
#1-2 Take the quiz and include a screenshot with your OdinID on it of the "Check your answers" page at the end of the quiz.



3. GCP Cloud SQL

- What are the names of the tables that are created?
  - Accommodation
  - Rating
  - Reccomendation
- What are the primary keys of each table?
  - Id
  - userId
  - userId

- What data (e.g. columns) does the Accommodation table hold?
    - id varchar(255),
    - title varchar(255),
    - location varchar(255),
    - price int,
    - rooms int,
    - rating float,
    - type varchar(255),
    - PRIMARY KEY (ID)
- Assuming the column data is ordered as in the DDL, list the attributes and their values for each accommodation in Dublin.
    - 6,Pleasant Quiet Place,Dublin,35,5,4.3,house
    - 77,Great Private Country House,Dublin,1150,10,2.4,mansion

For late use:

```
None
curl http://ipecho.net/plain ; echo
```
